**Your question:** I have wasted 2yrs ( 2017-19 ) in order to prepare myself for medical entrance examination(NEET). The parents were supportive at that time but not now. Since my father wanted me to be a doctor but he wasn't financially strong to send me abroad.

So in order to continue my studies i pursued bsc physics from a near by private college but this triggered my father and he stopped his financial support from his end.

Now i am in a mind block since my father is insisting me to go to work since i can't prove myself.

My only option at this moment is to get into a govt college and continue my studies.

What are my other options?

1. Firstly, there are good Dhana Yogas – which will give good wealth

2. Therefore not to worry about earnings and wealth – which you will have nicely
3. There will be a BIG change in your life from Oct-2022
4. As there will be a change in the Maha dasha – which in turn brings change in your life too positively
5. This time period is very good wrt profession and earnings
6. So, without second thought go ahead and start working
7. Simultaneously you can plan for Masters but
8. You should focus on Profession from October
9. MBA & anything related Administration is also fine
10. My suggestion is start working and simultaneously prepare for Govt jobs
11. The next Dasha or time period is very good to crack Govt exams and get placed well
12. As you have mentioned – UPSC and International Business are good options

**Conclusion:** Start working and simultaneously prepare OR study for UPSC (anything related to MBA or Communication related and you will succeed).
